PROFESSIONAL SUMMARY

Data Science Analyst with 2+ years of experience across FinTech analytics, machine learning, statistical modelling, and AI-enabled data solutions. Proficient in Python, SQL, PySpark, deploying production models using FastAPI, utilizing MLflow for experiment tracking and building Generative AI and Agentic AI systems using LangGraph, RAG and LLM orchestration. Strong financial-services domain knowledge and ability to translate business problems into scalable analytical and AI solutions in collaboration with engineering and business stakeholders.

TECHNICAL SKILLS

- **Programming and Data:** Python, SQL, PySpark, Pandas, NumPy, SciPy, Advanced SQL
- **Machine Learning & DL:** scikit-learn, Random Forest, XGBoost, Hyperparameter Tuning, Isolation Forest, Predictive Modelling, Time Series (ARIMA, Prophet), PyTorch, TensorFlow, Keras, Text Embedding, FAISS, Hugging Face Transformers
- **Statistics:** Hypothesis Testing, ANOVA, Chi-Squared, t-Test, Mann-Whitney, A/B Experimentation, Statistical Power Analysis, Bayesian Inference, Causal Inference
- **MLOps & Deployment Tools:** Jenkins, MLflow, Weights & Biases, ONNX, FastAPI, Docker, Kubernetes
- **GenAI and BI Tools:** Langchain, LangGraph, Agentic RAG, DSPy, RAG, Harness Engineering, Power BI, Tableau, Git, Jira
- **AI-assisted coding:** Claude Code, Codex, Cursor, GitHub Copilot, CodeRabbit
- **Data Platforms & Cloud:** Databricks, Snowflake, PostgreSQL, AWS, GCP, Azure, Sagemaker, Bedrock, Vertex AI

WORK EXPERIENCE

Independent Data Science & ML Practitioner | Self-Directed

Feb 2023 to Present | Kolkata, India

- **Developed and deployed ML systems** across customer analytics, churn, fraud and decision-support use cases, covering feature engineering, model training, validation, explainability and API deployment with FastAPI and Docker.
- **Built and deployed Agentic AI systems using LangGraph**, including multi-agent orchestration and Hybrid RAG pipelines achieving **>95% contextual recall**, with cloud deployment, observability and responsible-AI controls.
- **Designed and interpreted A/B experiments with statistical power analysis** validating a 10 to 20% engagement lift with p-value less than 0.0001 using walk-forward cross-validation to prevent temporal leakage.

Research Analyst | Data Science and Statistical Analysis | Decimal Point Analytics

Jun 2022 to Nov 2022 | Nashik, India

- **Built Random Forest Regressor over Classifier** improving performance to **8% nRMSE and 0.92 adjusted R²** from baseline **62% accuracy and 51% recall**.
- **Engineered a supervised learning pipeline for hand labelling of high-value financial information**, assigning higher importance scores to relevant data while assigning low baseline scores to irrelevant content.
- **Improved fraud detection XGBoost PR-AUC from 75% to 92%** using ANOVA and chi-squared analysis.
- Provided business recommendations for client leadership based on statistical findings, correlation analysis and significance testing.
- Led and mentored a 4-analyst team for SQL practices and maintaining documentation standards.

Junior Data Analyst | Decimal Point Analytics

Apr 2021 to Jun 2022 | Nashik, India

- **Reduced SQL analysis runtime by 40%** through optimisation of complex queries using CTEs, window functions and indexing across large transactional datasets.
- Built and optimized automated data workflows on Power Automate reducing manual data-collection effort by **60%**.
- Translated business requirements from Product Managers into analytical datasets, KPIs, and reporting workflows, collaborating cross-functionally to deliver actionable insights.

Finance Analyst Intern | Decimal Point Analytics

Oct 2020 to Apr 2021 | Nashik, India

- Analyzed financial statements and business performance data across US, UK, and Canadian companies to identify trends, inconsistencies, financial risks, and performance drivers.

EDUCATION

Non-Degree Certificate Programme | Data Science and Machine Learning | Scaler Academy *Feb 2023 to Jun 2025*

Bachelor of Commerce (Honours) — Accounting & Finance | Heramba Chandra College, Kolkata *2015 to 2018*

SELECTED AI/ML PROJECTS

- **Autonomous SRE Agent** | LangGraph, RAG, GCP, Isolation Forest — Built a multi-agent incident diagnosis system with Hybrid RAG achieving over 95% contextual recall.
- **CLV & Cross-Sell Prediction** | LightGBM, XGBoost, Cox PH, HDBSCAN — Built customer prediction models achieving $R^2=0.61$, C-index=0.89 and AUC=0.92+.
